Owner/Driver:	Mark Furcini Phoenix, Arizona
Owned Since:	1986 Restored in: 2003
Raced at:	Riverview, Laguna Seca, Portland, Elk Hart Lakes, Ontario

Corvette

A racecar since purchased new in 1967 by Dr. Bill Geen. He raced in club events- slalom and hill climbs until he met Greg Pickett. They combined their efforts to form Pickett Racing consisting of this A Production Corvette and a A Sedan Camero. Thus began their serious racing careers they campaigned the two cars at SCCA club events on the west coast as well as select Trans Am events in the early 70's.

Dr. Geen sold the car in 1976 to Stan Laskin and he continued to compete A Production with SCCA. I purchased the car from Stan in 1986 and began racing it in vintage events and some SCCA super production regional races. As indicated I am the third owner and interesting enough still hold the original California pink slip in Dr. Geen's name also this car still has the original frame and mfg vin tag and the car holds a SVRA medallion certificate.

As of September 2003 we have just completed a body-off restoration that Dr. Geen was kind enough to participate in as a technical advisor. The car's painted in its original color and livery. Dr Geen retired from racing in 1976, Greg Pickett went on to become the Trans Am champion in 1978 and has continued to race and win various titles and championships ever since. In November 2003 Greg was reunited with our car and spent the weekend with us at VARA's Big Bore Bash at Willow Springs.

No expense was spared, no detail was overlooked in restoring this old beast to its current pristine condition. We have been told it is one of the finest that exists.

1967
